

# MARSHALL UNIVERSITY AWARDED DIABETES RESEARCH GRANT

*Posted on August 3, 2018 by Daniella Hankey*

HUNTINGTON, WV (WOAY)- The U.S. Department of Health and Human Services (HHS) has awarded Marshall University \$440,405 for diabetes, endocrinology, and metabolic research.

The funding will help aid research in the identification of diabetes susceptibility genes through integrated functional genomics analysis of gene-diet interaction.

The funding was successful with the help of Senator Shelly Moore-Capito and Senator Joe Manchin.
